

MAKE IT
HYPERSECURE 

DRIVELOCK THE SECURITY ENTHUSIASTS

We believe every company deserves robust protection against production downtime, revenue loss, reputational damage, and customer loss due to cybercrime.

Our goal is to efficiently protect your business against attacks and safeguard your sensitive data from any loss – all powered by the leading and innovative security technology of our strategic HYPERSECURE platform.

Our Philosophy

As a global company, we are a leading provider of comprehensive IT security on a single platform. With our efficient applications, our customers can flexibly design their security strategies. Paired with a dedicated DriveLock team, our solutions represent the pinnacle of „IT security made in Germany.“

Our Mission

DriveLock delivers best-in-class technologies, tools, and sustainable expertise to safeguard valuable corporate data, services, and individuals from cyber-attacks. Our mission is to be a reliable and professional partner, committed to ensuring our customers' protection and success.

YOUR ADVANTAGES

EASY AND IMMEDIATELY AVAILABLE

DriveLock provides a comprehensive security service, from hosting the entire solution to management by experienced IT security experts.

EFFICIENT AND ECONOMICAL

DriveLock delivers the highest level of IT security with maximum scalability. Our security standards are individually adaptable and resource-efficient, tailored to your protection needs, company size, and growth trajectory.

COMPLIANT AND SECURE

Experience top-tier administrative and technical security measures, including BSI-audited Microsoft Cloud Services, Cloud Computing Compliance Controls Catalogue (C5), and Common Criteria EAL 3+.

TAILORED IT MANAGEMENT

Our security management solutions are customized to meet your specific needs—whether it's enforcing company security policies or managing and configuring security profiles.

MAXIMUM DATA SECURITY

DriveLock and Microsoft Azure Cloud ensure the confidentiality, integrity, and high availability of your data.

GERMAN ENGINEERING EXCELLENCE

DriveLock provides unparalleled IT security globally, backed by high-availability data centers in Europe, German-based support, and a no-backdoor guarantee.

DRIVELOCK LEADERSHIP

Pioneering Spirit, Experience, and Strategic Vision

Arved Graf von Stackelberg CEO

With over 30 years of experience focused on IT security, Arved brings a wealth of knowledge to DriveLock SE. Before joining DriveLock, he served as CEO of Dracocon GmbH, where he dedicated himself to accelerating digital transformation in Germany. Arved has also managed international business relations at Empirix (Oracle), Fortify, and Veracode, led HP's IT security business in Germany, and held the CEO position at KeyIdentity GmbH.

Udo Riedel CTO

As the co-founder and CTO of DriveLock SE for over 20 years, Udo oversees Research & Development, Quality Management, and Software Development. His role involves driving the technical advancement of DriveLock and integrating new technologies into the software. Prior to founding DriveLock, Udo worked as an IT consultant for several years.

AWARD-WINNING AND CERTIFIED

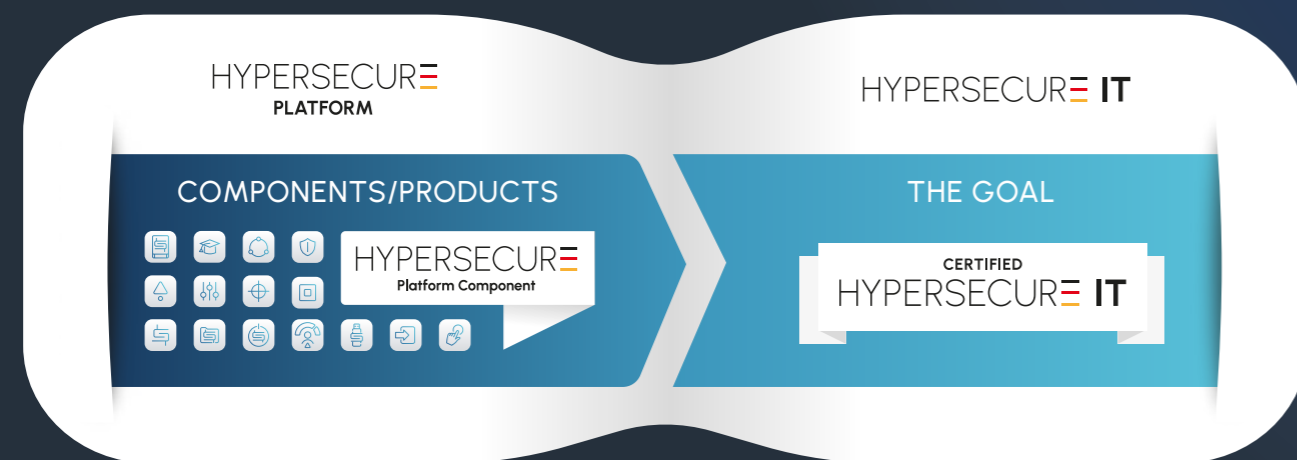

HYPERSECURE IT

DriveLock introduces HYPERSECURE IT, the new high-performance class in IT security. Traditional security solutions aim to combat criminal activities within IT systems. We take a different approach.

With the HYPERSECURE Platform, we ensure that cyberattacks never even reach your IT environment. They stay where they belong: on the outside!

The basis for this: Zero Trust, next level. Made in Germany and perfectly implemented.

DIE HYPERSECURE PLATFORM

The HYPERSECURE Platform integrates DriveLock's cutting-edge preventive defense solutions with meticulously selected and validated European partner technologies, delivering unparalleled IT security, digital sovereignty, and compliance with minimal administrative burden.

Our platform's proactive approach empowers you to shield your system from unknown threats by exclusively using pre-approved devices and software. This ensures robust security without intrusive system interference or constant updates.

What truly distinguishes the HYPERSECURE Platform is its unwavering dedication to digital sovereignty and its proud „Made in Germany“ ethos. Adhering to stringent local regulations and standards, such as GDPR, we ensure that your data and systems are safeguarded in accordance with regional

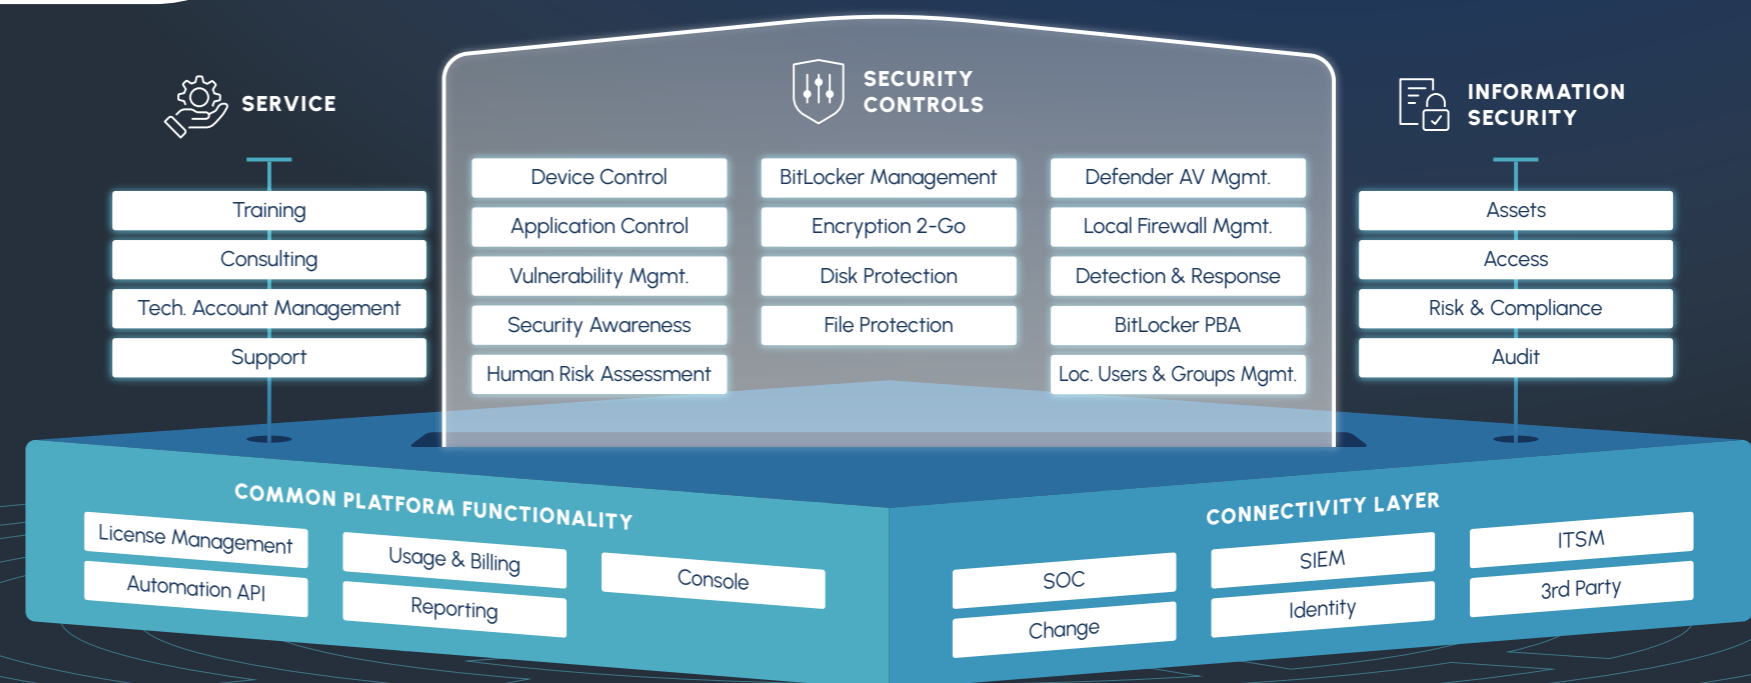

compliance mandates. This commitment to local compliance helps you retain control over your data and systems, significantly reducing dependence on foreign security solutions.

The platform delivers centrally managed, multi-layered security solutions with targeted access controls that are cloud-based, user-friendly, and cost-efficient, all while keeping administrative overhead low.

What truly sets the HYPERSECURE Platform apart is its exceptional scalability. Seamlessly integrate, automate, and orchestrate components from pre-vetted partners using bidirectional interfaces and standardized APIs. This capability not only expands your security toolkit but also enhances overall protection, ensuring your organization remains one step ahead of emerging threats.

HYPERSECURE CODEX

- › Strategic importance and technological excellence
- › European corporate governance, development, operation, and service
- › Certified solutions and no backdoors
- › Flexibility and customer-centric approach
- › Commitment to sustainability and social responsibility

SECURITY CONTROLS

Slow down attacks, prevent breaches, and make it exceedingly costly for cybercriminals!

HYPERSECURE 
Platform Components

The HYPERSECURE Platform combines various security mechanisms for Endpoint Protection, Data Protection, and Detection & Response into a flexible, open platform designed to enhance enterprise IT security.

Leveraging a blend of cutting-edge technologies and methods, the platform provides comprehensive protection against cyber threats. It also features standardized APIs for easy automation and seamless integration with other systems.

CORE PROTECTION

 **APPLICATION CONTROL**
Block the execution of any application on your endpoints.

 **DEVICE CONTROL**
Monitor, manage, and restrict access to external devices.

 **VULNERABILITY MANAGEMENT**
Gain complete visibility into your attack surface.

 **DETECTION & RESPONSE**
Maximize security through incident detection and resolution.

MICROSOFT SECURITY TOOLS

 **DEFENDER AV MANAGEMENT**
Achieve robust and holistic security architecture through effective synergy.

 **SECURITY CONFIGURATION MANAGEMENT**
Manage OS-integrated security mechanisms centrally.

 **BITLOCKER MANAGEMENT**
Simplify and centralize the management of BitLocker environments.

HUMAN RISK AND AWARENESS

 **SECURITY AWARENESS**
Incorporate the human factor into a comprehensive security strategy.

 **HUMAN RISK ASSESSMENT**
Identify human risks through comprehensive assessments.

ENCRYPTION SOLUTIONS

 **BITLOCKER MANAGEMENT**
Simplify and centralize the management of BitLocker environments.

 **ENCRYPTION 2-GO**
Implement container and file-based encryption for removable media.

 **BITLOCKER PBA**
Enhance security with pre-boot authentication, MFA, network boot, and SSO.

 **DISC PROTECTION**
Encrypt disks in compliance with GDPR following BSI recommendations.

 **FILE PROTECTION**
Secure directories and files on local folders and network drives through encryption.

FOR OVER 20 YEARS, WE'VE BEEN PROTECTING WHAT MATTERS MOST TO YOU: YOUR DATA.

With our certified HYPERSECURE Platform, you get robust multi-layered security that keeps cyber-attacks out. Enjoy the advantages of a cloud-based, resource-efficient, and cost-effective solution tailored to safeguard your business comprehensively. Trust a solution available both in the cloud and

on-premises, simplifying complexity for administrators. Whether you're a small-to-medium business or a large enterprise, we reliably protect people, businesses, and services from data loss. DriveLock: Your trusted choice for Endpoint Protection, Data Protection, and Detection & Response.
