365 ACCESS CONTROL

**Automated control and transparency
when accessing Microsoft 365**

YOUR CHALLENGES

With Microsoft 365, it's easy for users to share access to files, websites and teams.

Employees change their roles and tasks. Customers, partners and locations come and go. The amount of data and the number of permissions keep increasing.

„Who needs access to what?“ is the key question and IT teams struggle to stay on top of it by relying on manual processes and tools alone.

Each unauthorized access to files is a potential security risk. Providing proof of control is critical to ensuring compliance.

OUR SOLUTION

Provides simple, intelligent and effortless access control for data in Microsoft 365

Secures file sharing integrated with Microsoft OneDrive, Teams and SharePoint Online

Ensures maximum transparency as to who is allowed to access data, for what reason and at what time

Allows automated and precise control of granular access permissions

Detects, manages, resolves and tracks security issues automatically

Classifies folders, libraries, websites and teams individually

YOUR BENEFITS

- 1 Features powerful transparency and control of file access in Microsoft 365
- 2 Helps data owners manage their data independently
- 3 Removes unwanted access automatically
- 4 It's implemented quickly and easily with just a few mouse clicks
- 5 Offers unique visualization of data access rights in Microsoft 365
