DEFENDER MANAGEMENT

**Central management and enhancement
of your protective measures.**

YOUR CHALLENGES

Using Microsoft Defender Antivirus helps detect and remove known malware and unwanted programs. And yet antivirus software is just one component of a holistic security strategy. To ensure the best possible protection, you need additional solutions for prevention:

You want to set up a maximum level of protection for your company and manage all your prevention tools centrally.

You want to be able to manage your security measures without Microsoft Intune or SCCM.

You need insight into your current security situation at all times.

OUR SOLUTION

Uses special prevention tools to conveniently manage Microsoft Defender Antivirus

Provides centralized, easy configuration capabilities via the DriveLock Management Console

Quickly manages all Defender AV settings within DriveLock policy centrally, without group policies

Visualizes classification of detected malware and shows status changes and threat levels over time

Uses scan results for DriveLock functions and creates synergies

Employs the virus scanner for external drives and automatic blocking of malware

YOUR BENEFITS

- 1 Improves your protection with valuable additional functions
- 2 Offers a comprehensive insight into the system environment
- 3 Features centralized, simple configuration options with reduced maintenance effort
- 4 Integrates automated response capabilities to detected threats
- 5 Provides compliance reporting in the DriveLock Operation Center
